PROFESSIONAL SUMMARY

Final-year B.Tech student pursuing Artificial Intelligence and Data Science with knowledge of Java, Python, SQL, Excel, and Power BI. Hands-on experience in data analysis and machine learning through internships and academic projects. Seeking internship and entry-level opportunities to apply technical and problem-solving skills in Software Development and Data Analytics.

TECHNICAL SKILLS

Programming:	Java, Python, SQL
Frontend:	HTML, CSS
Libraries:	Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
Data Analysis:	Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA)
Data Visualization:	Power BI, Excel Dashboards
Tools:	Git, GitHub, VS Code, Jupyter Notebook, Excel

EXPERIENCE

Artificial Intelligence Intern — RINEX Jan 2025 – Feb 2025

- Developed basic machine learning models using Python and Scikit-learn.
- Performed data preprocessing, feature selection, and model evaluation.

Data Science Intern — SMEC Labs Jun 2025 – Jul 2025

- Cleaned and analyzed datasets using Python and Excel.
- Created visualizations and dashboards using Power BI.
- Presented insights using charts and reports for effective decision-making.

PROJECTS

Wildlife Animal Detection & Alert System

- Developed a real-time wildlife detection system using Python, YOLOv8, and OpenCV to identify animals such as tigers, lions, bears, and elephants.
- Implemented automated ntfy notifications with detected images for real-time wildlife alerts.
- Built a Tkinter GUI with start/stop controls to manage the detection system.
- Prepared and filtered a large Kaggle dataset and created training, validation, and testing datasets.
- Integrated a separate person-detection model to reduce false alerts caused by incorrect classifications.

Smart Weather Monitoring System

- Developed an IoT-based weather monitoring system using NodeMCU ESP8266, DHT11, rain sensor, and LDR to monitor environmental conditions.
- Integrated a 16x2 I2C LCD to display temperature, humidity, rainfall, and light readings in real time.
- Connected the system with Blynk IoT for remote monitoring of environmental conditions.
- Implemented real-time sensor data collection and environmental monitoring.

Sales Data Dashboard

- Processed and analyzed sales data using Python and Excel.
- Built interactive Power BI dashboards to visualize business metrics and insights.

CERTIFICATIONS

- Deloitte Australia – Data Analytics Virtual Experience Program
- Tata – Data Visualization: Empowering Business with Effective Insights
- Data Science Internship – SMEC Labs
- Artificial Intelligence Internship – RINEX

EDUCATION

Bachelor of Technology (B.Tech) – Artificial Intelligence and Data Science

Dhanalakshmi Srinivasan Engineering College, Anna University

Expected Graduation: 2027
